

AMENDMENTS TO THE SPECIFICATION:

Please amend the specification as follows:

Please add the following new paragraph at line 33, on page 8 of the specification:

Figure 6 shows a perspective view of a needle unit for use in a drug delivery device according to an embodiment of the invention.

Please replace the paragraph beginning on at line 11, on page 9 with the following amended paragraph.

The cartridge 4 may be secured in position in the first end of the housing 2 by any suitable means. In the illustrated embodiment, a cartridge retainer 12 is secured, by any suitable means, to a first side of the web to retain the cartridge in position. A needle unit ~~(not shown)~~ such as item 60, for example, depicted in Figure 6, may be secured to a first end of the cartridge retainer 12. The cartridge 4 further comprises a displaceable piston 10. Advancing the piston 10 towards the first end of the cartridge 4 causes the medicinal product to be expelled from the cartridge 4 through the needle unit 60. A cap 62, for example, depicted in Figure 6 may be provided to cover the needle unit 60 when the device is not in use.
